ABOUT THE PROGRAM

In India's rapidly growing digital landscape, pursuing a Bachelor of Computer Applications (BCA) has become a highly sought-after degree with significant opportunities. The Cloud & Security specialisation within the BCA program at UPES Online, is designed to equip students with expertise in cloud computing and cybersecurity. In this specialisation, students explore topics such as cloud infrastructure management, virtualisation, network security, and data protection. These specialisations within the BCA program at UPES Online provide students with specialised knowledge and practical skills in areas that are highly relevant in today's technology-driven world. By selecting a specialisation that aligns with their interests and career goals, students can develop expertise in specific domains and enhance their prospects in the job market.

KEY HIGHLIGHTS OF THE PROGRAM

Interactive Live Sessions

Learn directly from industry experts and global faculty through engaging live sessions.

Dedicated Academic Advisor

Receive personalised guidance and support for your academic and career journey.

Real-World Application

Acquire practical skills through engaging projects and case studies for real-life impact.

WHO IS THIS PROGRAM FOR?

Those who have just completed their schooling as well as aspirants who want to pursue a career in computer applications.

Aspirants who want to jump-start their career in Computer Applications.

Aspirants who want to specialize in Computer Applications.

ELIGIBILITY

- Minimum 50 percent marks or equivalent in XII from a recognised board with Mathematics / Computer Science / Information Technology as subjects in XII .
- Minimum 50 percent marks or equivalent in 3 years diploma recognised by AICTE after SSC (class X).
- **For candidates with Non-Mathematics /IT/Computer Science background**
 - Candidates who have not studied Mathematics /IT/Computer Science in class XII, will be required to complete a Basic Mathematics/Basic Computer Information Systems course, respectively along with the first semester courses.

LEARNING OUTCOMES

- Focus on cloud computing, network security, and information security.
- Practical training in cloud platforms and security tools.
- Real-world case studies and projects. Understanding security risks and implementing robust security measures.
- Industry-relevant certifications and training. Articulate and apply different techniques essential for cloud adoption.
- Migration or management of cloud services irrespective of the Cloud Service Provider.

PROGRAM FEES

Indian Students

₹1,50,000 (Per Semester Rs. 25,000)

International Students

\$1,786 (Per Semester \$298)

For FAQs - Visit upesonline.ac.in

CAREER PROSPECTS

- Cloud Developer
- Security Analyst
- Security Engineer
- Cloud Engineer
- Cloud Infrastructure Specialist
- Information Security Specialist

CURRICULUM

Semester 1

- Business Communication
- Computer and Information Technology
- Programming in C
- Network Basics
- Basic Mathematics

Semester 3

- Python Programming
- Organizational Behavior
- Business Analytics
- Computational Statistics
- Innovation and Information Technology Management

Semester 5

- Quantitative Techniques
- Business Policy & Strategies
- Demand Forecasting and Production Planning
- Materials Management
- Lean Manufacturing

Semester 2

- Individual Excellence and Social Dynamic
- Operating System Concepts
- Data Environment and Management
- Object Oriented Programming Using Java

Semester 4

- Unix Operating System and Shell Programming
- Data Structure Using C
- Software Engineering & Modelling
- Cyber and Information Security

Semester 6

- Essentials of Logistics & Supply Chain Management
- Contract Manufacturing and Outsourcing
- Dissertation

CAREER SERVICES

Our comprehensive career services guarantee your career preparedness and employability for the professional world.

- Career Orientation
- LinkedIn/Resume building guidance
- Mock Interviews
- Mentorship by industry experts
- Interview preparation

ABOUT THE PROGRAM

In India's rapidly growing digital landscape, pursuing a Bachelor of Computer Applications (BCA) has become a highly sought-after degree with immense potential. The Data Analytics specialization in the BCA program at UPES Online equips students with the knowledge and skills to utilize data for business insights and decision-making. This specialization focuses on data mining, data visualisation, statistical analysis, and predictive modeling.

These specialisations within the BCA program at UPES Online provide students with specialized knowledge and practical skills in areas that are highly relevant in today's technology-driven world. By choosing a specialization that aligns with their interests and career goals, students can develop expertise in specific domains and enhance their prospects in the job market.

KEY HIGHLIGHTS OF THE PROGRAM

Interactive Live Sessions

Learn directly from industry experts and global faculty through engaging live sessions.

Dedicated Academic Advisor

Receive personalised guidance and support for your academic and career journey.

Facilitated Group Interactions

Participate in supervised discussion forums to collaborate and interact with peers.

Real-World Application

Acquire practical skills through engaging projects and case studies for real-life impact.

Robust Learning Management System

Learn from updated study materials, online library, and a user-friendly learning platform.

WHO IS THIS PROGRAM FOR?

Those who have just completed their schooling as well as aspirants who want to pursue a career in computer applications.

Aspirants who want to jump-start their career in Computer Applications.

Aspirants who want to specialize in Computer Applications.

ELIGIBILITY

- Minimum 50 percent marks or equivalent in XII from a recognised board with Mathematics / Computer Science / Information Technology as subjects in XII .
- Minimum 50 percent marks or equivalent in 3 years diploma recognised by AICTE after SSC (class X).
- **For candidates with Non-Mathematics /IT/Computer Science background**
 - Candidates who have not studied Mathematics /IT/Computer Science in class XII, will be required to complete a Basic Mathematics/Basic Computer Information Systems course, respectively along with the first semester courses.

LEARNING OUTCOMES

- Comprehensive study of data analysis techniques and tools.
- Hands-on experience with data visualisation and reporting tools.
- Data mining, data warehousing, and big data analytics.
- Practical exposure to real-world datasets and analytics projects.
- Understanding business insights and decision-making through data analysis.
- Gain access to specialized Coursera courses tailored to your domain after your enrolment and earn global certifications from prestigious universities like Wharton Online, University of Minnesota, University of California, University of Illinois, University of London, Rutgers University, and more.

CAREER PROSPECTS

- Data Analyst
- Reporting Analyst
- Data Entry Operator
- Business Intelligence Analyst
- Data Visualisation Specialist
- Data Analytics Manager
- Database Analyst

CURRICULUM

Semester 1

- Business Communication
- Computer and Information Technology
- Programming in C
- Network Basics
- Basic Mathematics

Semester 2

- Python Programming
- Organizational Behavior
- Business Analytics
- Computational Statistics
- Innovation and Information Technology Management

Semester 3

- Introduction to Artificial Intelligence
- Fundamentals of E commerce
- Data Warehousing and Mining
- Introduction to e-Governance
- Elective 2
- Elective 3

Semester 4

- Fundamentals of Cloud Computing and Enterprise
- Internet of Things
- Introduction to Enterprise Resource Planning
- Project Management
- Blockchain Technologies

Semester 5

- Individual Excellence and Social Dynamic
- Operating System Concepts
- Data Environment and Management
- Object Oriented Programming Using Java

Semester 6

- Unix Operating System and Shell Programming
- Data Structure Using C
- Software Engineering & Modelling
- Elective 1
- Cyber and Information Security

Semester 7

- Major Project
- Elective 4
- Elective 5
- Data Analysis Using Excel

ABOUT THE PROGRAM

In India's rapidly growing digital landscape, pursuing a Bachelor of Computer Applications (BCA) has become a highly sought-after degree with tremendous opportunities. The New Age Technology specialisation in the BCA program at UPES Online, offers students the skills and knowledge needed to thrive in the fast-paced world of emerging technologies. This specialisation focuses on cutting-edge technologies such as Artificial Intelligence (AI), Machine Learning (ML), Internet of Things (IoT), and Blockchain. These specialisations within the BCA program at UPES Online provide students with specialized knowledge and practical skills in areas that are highly relevant in today's technology-driven world. By choosing a specialisation that aligns with their interests and career goals, students can develop expertise in specific domains and enhance their prospects in the job market.
