ABOUT OUR PROGRAM

Rapid technological advancements and mechanization in industries like Petrochemical, Chemical, Engineering, and Construction have given rise to intricate Health, Safety, and Environmental challenges. To tackle these issues, qualified safety professionals are essential to address various aspects of safety, health, and the environment for personnel and others impacted by these industries. In response to this demand, the Post Graduate Program in Industrial Safety offers this program designed to enhance students' core competencies, providing futuristic education to meet the evolving needs of organizations and equip individuals with the skills needed for continuous career growth.

PROGRAM BENEFITS

The objective of this program is to develop professionally-qualified and trained professionals to handle Health, Safety and Environment issues at workplace and shall have the following competencies:

1

To look after the Health, Safety and Environmental aspects with knowledge and expertise in HSE management systems, safe handling of materials and machinery, safe work practices, operational controls and to establish and improve emergency action procedure.

2

To be responsible for compliance of all legal and other obligations of the organisation.

3

To guide and assist the site managers / engineers to make their sites safe and accident free.

4

To train personnel in safety, undertake safety surveys and design suitable documents for recording and promoting safety at the work place.

5

To establish the learning experience within the context of industrial application, thus enabling the integration of theoretical knowledge and understanding with best industrial practice in health, safety and environmental sustainability.

UNIQUE FEATURES

- Health, Safety & Environment (HSE) programs offered by UPES are recognised by Section of Labour & Employment, Uttarakhand Government as per gazette notification No. 691/VIII/13-21(Shram)/2013.
- UPES is a UGC-entitled university and all programs are approved by its academic council.

ABOUT OUR PROGRAM

It's a 10-month PG Program for professionals who need focused program in Operations Management. The program is meant for professionals moving into mid or senior management roles in domains like e-commerce, aviation, manufacturing, hospitality, retail, and consulting. The program is delivered in a blended learning format of self-learning, live sessions from expert faculty members, case study discussions and real-life problem solving.

PROGRAM BENEFITS

The objective of this program is to develop professionally qualified and trained professionals to handle Operations and shall have the following competencies:

- 1** To develop a solid understanding of operations management concepts such as operations, quality management, production planning, and inventory management.
- 2** To learn to analyse data and make informed decisions based on their findings. This includes using mathematical models, statistical tools, and simulation techniques to optimise processes and improve efficiency.
- 3** To develop critical thinking skills and learn to solve complex problems using a systematic approach. They will also learn to identify opportunities for improvement and implement innovative solutions.
- 4** To learn to communicate effectively with various stakeholders such as suppliers, customers and employees. They will also learn to prepare reports and presentations to communicate results and recommendations.
- 5** To learn to manage resources efficiently, including people, machines, materials, & information. This involves scheduling production, coordinating with suppliers and customers and optimising resource utilisation for maximum productivity.
- 6** To gain knowledge about regulatory and legal requirements related to operations management, such as safety regulations, labour laws, and environmental regulations.
- 7** To learn to work collaboratively and lead teams effectively to achieve operational goals. They will also develop leadership skills such as decision-making, conflict resolution, and motivation.

UNIQUE FEATURES

This program intends to make you an exceptional professional in operations management to pursue a career at mid or senior management level in Operations or related industries. It covers key concepts, international best practices and along with key management skills. The program is designed by industry experts and delivered online to suit working professionals.

- Delivered in blended learning format that is best suited for working professionals
- Expert faculty with hands on learning approach and practical insight
- Case studies for insight into real life projects
